

SUBJECT INDEX

A

- Acid, free fatty, control by *Corynebacterium acnes*, 127
- Acne, conversion of testosterone to dihydrotestosterone, 366
- Actinomycin-D, inhibition of RNA and protein synthesis, 211
- Adrenalin, effect on sweat production, 384
- Aldosterone, effect on sweating, 337
- Announcements
 - Acknowledgment, 82, 258, 418
 - American Academy of Dermatology Scientific Exhibits, 163, 256, 342
 - Aspen Conference for Dermatologists, 480
 - Course in Dermal Pathology, 481
 - Earl D. Osborne Fellowship in Dermal Pathology, 256, 341
 - Erratum, 163, 342, 417
 - XIV International Congress of Dermatology, 79
 - Joint Meeting, 416, 480
 - Meeting on the Biology of Epidermal Wound Healing, 162
 - Meetings and Workshops, 80, 161, 257
 - Pacific Dermatologic Association, 81, 162
 - Psoriasis Research Award for 1970, 341
 - Third World Congress of the International Society of Tropical Dermatology, 416
 - Thirty-second Annual Meeting and Special Lectures, 80, 161, 258, 342
- Annual meeting, thirty-second program, 400
- Antibodies, pemphigus, role in disease, 474
- Antigens, wart tissue, 305
- Architecture, cellular, stratum corneum, 165
- Artemisia causing allergic contact dermatitis, 98
- Axilla, hair density, 362

B

- Bioassay, epidermal chalone inhibitor, 174
- Biomechanics of stratum corneum, influence of relative humidity, 72

C

- C¹³ levels in pemphigus patients, 450
- Candida albicans*, psoralen-type phototoxicity, 340
- Carcinoma, basal cell, electron microscopic study, 298
- Cells
 - differentiated, *in vitro* proliferation, 454
 - epidermal
 - in vitro* proliferation, 454
 - isolation, 318
 - properties, 318
 - kinetics in human epidermis, 425

- Langerhans, in epidermoid metaplasia, 10
- melanoma, toxicity of hydroquinones, 287
- oral epithelial dendritic, 325
- pigment, toxicity of hydroquinones, 287
- red blood, hemolysis, 85
- skin epithelial, growth on collagen gels, 205
- Chalone-like inhibitor, characterization, 353
- Chrysanthemum causing allergic contact dermatitis, 98
- Conidia, germination test in antifungal evaluations, 83
- Cortisol injection
 - skin radioactivity after, 419
 - wound radioactivity after, 419
- Corynebacterium acnes*
 - control of free fatty acids, 127
 - lipase inhibition by tetracyclines, 189

D

- Decarboxylase activity
 - histamine quantitative histochemistry, 231
 - histidine, quantitative histochemistry, 231
- Dimethyl sulfoxide as 80% gel metabolism, 44
- Deoxyribonucleic acid, epidermal
 - characterization, 55
 - isolation, 55
- Deoxyuridine uptake, methotrexate inhibition, 294
- Dermatitis
 - allergic contact, 98, 259
 - primary irritant contact, 259
- Dermatitis herpetiformis, immunofluorescence studies, 373
- Dihydrotestosterone, conversion from testosterone, 366
- Drugs
 - antimitotic, screening for topical effectiveness, 132
 - excretion, in eccrine sweat, 182

E

- Epidermis
 - cell population kinetics, 425
 - α -fibrous protein precursor, 446
- Epinephrine, effects on eccrine sweat gland, 272
- Ester, phorbol, ¹⁴C-acetate localization in skin tumors, 140
- Ether, monoethyl, toxicity, 287

F

- α -Fibrous protein of epidermis, precursor, 446
- Fluocinonide, vehicle design, 392
- Follicles

- hair
 non-keratin protein filaments in, 49
 tritiated thymidine in, 311
 skin, tritiated thymidine in, 311
- G**
- Gels, collagen, growth of skin epithelial cells on, 205
 Germination test, conidial, in antifungal evaluations, 83
 Glucose metabolism, eccrine sweat gland, 272
 Glycine-2- H^3 in nail, 61
 Glycogen keratinocyte
 galactosamine in, 113
 glucose in, 113
 Glycosaminoglycans, intravenous papain, effect of, 381
- H**
- Hair
 axillary, 362
 chemical modifications, 200
 mechanical properties, 200
 neogenesis, 1
 Hapten feeding, immunologic unresponsiveness after, 441
 Hemolysis, red blood cell, 85
 Herpes simplex, zoster-like, 193
 Histamine, skin, x-ray changes, 69
 Humidity, relative, on stratum corneum, 72
 Hydroquinone monoethyl ether, toxicity, 287
 Hypersensitivity, lymphocyte responses, 349
- I**
- Immunofluorescence in dermatitis herpetiformis, 373
 Inhibitor
 chalone-like, 353
 epidermal chalone bioassay, 174
 Inhibition
 protein synthesis, 211
 RNA synthesis, 211
 Interactions, epidermal-dermal, dermal influence, 18
- K**
- Keratinase, cell-bound, of *Trichophyton mentagrophytes*, 27
 Kinetics, cell, in human epidermis, 425
- L**
- Lactone, sesquiterpene, in allergic contact dermatitis, 98
 Light, effect on skin lipid metabolism, 387
 Lipase, *Corynebacterium acnes*, inhibition by tetracycline, 189
- Lymphocyte responses in contact hypersensitivity, 349
 Lysosomes in melanoma, 436
- M**
- Malnutrition, protein, effect on toxic porphyria, 223
 Mecholyl, effects on eccrine sweat gland, 272
 Melanoma
 Harding-Passey ultrastructural studies, 430
 lysosomes in, 436
 murine malignant inhibition by polyinosinic-polycytidylic acid, 33
 Melanocytes, mammalian, toxicity of hydroquinone, 287
 Membrane, melasomal permeability, 343
 Mercuric chloride, topical application, 147
 Metabolism
 dimethyl sulfoxide as an 80% gel, 44
 skin lipid, light on, 387
 Metaplasia, epidermoid, Langerhans cells in, 10
 Methotrexate inhibition of deoxyuridine uptake, 294
 Mice
 hairless, 170
 herpes simplex in, 193
- N**
- Nail
 glycine-2- H^3 in, 61
 thymidine-methyl- H^3 in, 61
 water vapor loss, 359
 Neogenesis, 1
- O**
- Ouabain, effects on eccrine sweat gland, 272
- P**
- Papain, intravenous, effect on cartilage glycosaminoglycans, 381
 Papilloma, rat
 induction, 102
 regression, 102
 Pemphigus
 antibodies, role in disease, 474
 serum concentration of C'3, 450
 Photohemolysis of salicylanilides, 91
 Phototoxicity of salicylanilides, 91
 Picryl chloride, immune tolerance after, 441
 Polyinosinic-polycytidylic acid, inhibition of melanoma, 33
 Porphyria, toxic, effect of protein malnutrition, 223
 Prekeratin of epidermis, precursor, 446
 Program

- spring meeting, 247
 - thirty-second annual meeting, 400
 - Proliferation of epidermal cells, 454
 - Protein
 - filaments, isolation of, 49
 - synthesis, puromycin in, 211
 - Psoralen phototoxicity, 340
 - Puromycin, inhibition of RNA and protein synthesis, 211
- R
- Radioactivity
 - skin
 - after cortisol injection, 419
 - after testosterone injection, 419
 - wound
 - after cortisol injection, 419
 - after testosterone injection, 419
 - Rhodanin in mice coats, 467
 - Ribonucleic acid
 - epidermal
 - characterization, 55
 - isolation, 55
 - inhibition, puromycin in, 211
- S
- Salicylanilides, phototoxicity, 91
 - Screen
 - rectal, for topical drugs, 132
 - vaginal, for topical drugs, 132
 - Serum, concentration of C'3 in pemphigus patients, 450
 - Skin
 - epidermal-dermal interactions, dermal influence, 18
 - Technetium-99m pertechnetate disappearance studies in, 39
 - Spring meeting, program, 247
 - Steroid, new topical, fluocinonide, 392
 - Stratum corneum
 - biomechanics, influence of relative humidity, 72
 - cellular architecture, 165
 - Sweat
 - human eccrine, drug excretion, 182
 - quantitative, after adrenalin injection, 384
 - gland, eccrine, glucose metabolism, 272
 - effect of aldosterone, 337

- Synthesis
 - macromolecular, and topically applied triamcinolone, 470
 - protein, inhibition of, 211
 - RNA, inhibition of, 211

T

- Technetium-99m pertechnetate, disappearance studies, 39
- Testosterone
 - conversion to dihydrotestosterone, 366
 - skin radioactivity after, 419
 - wound radioactivity after, 419
- Tetracycline, *Corynebacterium acnes* lipase inhibition, 189
- Tetramethyl thiuram-monosulphide, psoralen-type phototoxicity, 340
- Thymidine, tritiated, in skin and hair follicles, 311
- Thymidine-methyl-H³ in nail, 61
- Toenail
 - proximal matrix, 235
 - ultrastructure, 235
- Tolerance, immune, after picryl chloride, 441
- Triamcinolone, topically applied, macromolecular synthesis, 470
- Trichophyton mentagrophytes, cell-bound keratinase of, 27
- Tumor, skin, phorbol ester ¹⁴C-acetate in, 140
- Tyrosinase activity, 343

U

- Ultrastructure, Harding-Passey melanoma, 430
- Unresponsiveness, immunologic after hapten feeding, 441

V

- Virus, Shope papilloma, 102

W

- Wart tissue antigens, 305
- Water vapor, loss through nail, 359

X

- Xeroderma pigmentosum, 281
- X-ray changes in skin histamine, 69
